

Switching to your library's Cloud

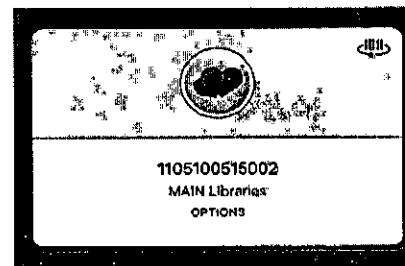

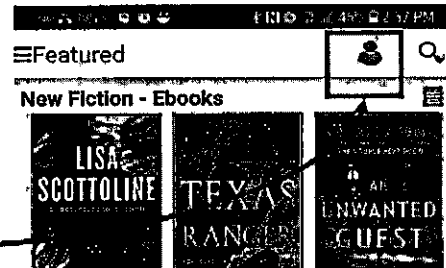

Why does it matter which Cloud I'm signed into?

If you are signed into the 'MAIN' cloud rather than your home library's cloud, you're not getting all of the items you're entitled to. Ensuring that you're signed up on your library's cloud will give you access to everything in the MAIN cloud *plus* everything that your individual library has purchased for its patrons.

For iOS Devices:

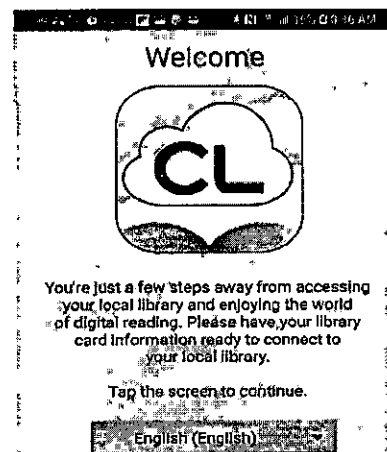

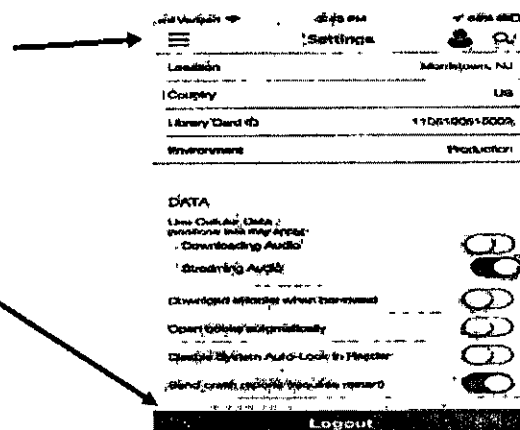

Am I signed in to my private cloud?

1. Open the cloudLibrary application.
2. Tap the blue 'person' icon on the top right corner.
3. Read what it says below your library card number. If it says 'MAIN Libraries', you are not in your private cloud.

What can I do to move over to my library's cloud?

1. Open the cloudLibrary application.
2. Tap the horizontal bar icon on the top left corner.
3. Choose 'Settings'. This will bring you to the 'Settings' screen.
4. Scroll to the bottom of the 'Settings' screen and choose 'Logout.' This will bring you back to the 'Welcome' screen.
5. Tap the screen.
6. Choose 'United States'
7. Choose 'New Jersey'
8. Select your home library. Do not select MAIN Libraries.
9. Enter your library card and PIN. Click 'Login'.

Congratulations, you're in your home library's cloud !
